

CARIBBEAN EARNER SERIES

AI BUSINESS BLUEPRINT

Charge Local Businesses **\$500–\$2,000/Month**
to Set Up and Manage AI For Them.

— CaribStream.io —

Real Skills. Real Income. No Hype.

AI Business Blueprint

Charge Local Businesses \$500–\$2,000/Month to Set Up and Manage AI For Them.

- 1 The AI Agency Model — What It Is and What It Pays**
How Caribbean professionals are charging \$500–\$5,000/month without coding or tech degrees
- 2 The Tool Stack — What You Actually Use**
Six tools that cover 90% of what local businesses need automated — learned in one weekend
- 3 Your Service Menu — What to Offer and What to Charge**
Five automations that sell themselves, priced for recurring monthly retainer income
- 4 Caribbean Business Owners — Your Warmest First Clients**
Who needs this most, why your community gives you the edge, and the pitch that opens every door
- 5 Landing Your First Client — The Demo That Closes**
Show them what their business looks like with AI running. The sale happens in the demo.
- 6 Scaling — From 3 Clients to 30**
The systems, the packages, and the income math that turns a side service into a full business

INCOME BENCHMARKS

\$8,000–\$20,000/month at 10–25 clients · Starter package \$500/mo · Full Stack
\$1,500–\$2,000/mo · No coding required · Caribbean community is your warmest market

The AI Agency Model

What it is, what it pays, and why right now is the right moment.

Local businesses — the Caribbean restaurant, the cleaning company, the plumber, the dental practice, the event planner — are losing revenue every single day to problems that AI tools fix automatically. A missed call at 9pm that goes unanswered. A lead that filled out a web form and never got a follow-up. An appointment that could have been booked automatically but required three phone calls. These are not exotic problems. They are happening at every small business in every city right now — and most business owners have no idea a fix exists.

\$8,000/mo

10 clients at \$800/month average retainer · No coding · No tech degree · Caribbean community is your fastest market

Why This Business Works for Caribbean Professionals

Caribbean business owners in diaspora cities are running sophisticated operations — catering companies managing 50 events a year, cleaning companies with 30 residential clients, event planners coordinating across multiple vendors — on manual processes and WhatsApp. They need these tools desperately and they have never had a trusted person from their community offer to set them up. You are not a cold-calling tech vendor. You are a Caribbean professional who understands their business, speaks their language, and is offering to automate the parts of their operation that are currently costing them revenue.

1

What You Are Selling

Time back. Leads captured. Customers served faster. Revenue recovered from missed calls and slow follow-ups. The tools are the mechanism. The outcome is what they buy. Never pitch the tool — pitch the revenue they are currently losing without it.

2

What Makes Clients Stay

Once AI automation is running inside a business, removing it creates immediate pain. Missed calls start going unanswered again. Follow-ups stop. Appointment bookings drop. Retention in this business is exceptionally high because the value is visible every single day. Nobody cancels something they can see working.

3

Why Right Now Is the Right Moment

AI automation tools that cost \$50,000/year to build five years ago now cost \$97/month off the shelf. The business owners who need them have not caught up with what is available. You are the bridge between a tool that exists and a business owner who needs it — and that gap is currently wide open in every Caribbean community in every diaspora city.

What you are selling

Time back. Leads captured.
Customers served faster. Revenue recovered from missed calls and slow follow-ups. The tools are the mechanism. The outcome is what they buy.

What makes clients stay

Once AI automation is running inside a business, removing it creates immediate pain. Retention in this business is exceptionally high because the value is visible every day.

CARIBBEAN EARNER PRINCIPLE

Trinidad invented the steel pan from oil drums — turning industrial waste into music heard around the world. AI tools are the new oil drums. Most businesses see complexity. You see opportunity. The transformation happens when someone picks it up and learns to play.

The Tool Stack

Six tools that cover 90% of what local businesses need — learned in one weekend.

You do not need 40 tools. You need to become genuinely expert in six. Master these six and you can serve any local business — restaurant, cleaning company, contractor, dental practice, event planner — with a complete AI automation package that justifies a \$500–\$2,000 monthly retainer. Every tool below has free tutorials, YouTube channels, and certification programs. One focused weekend puts you ahead of 99% of the businesses you will serve.

Your Core Tool Stack

1	GoHighLevel — Your Backbone All-in-one CRM, automation, and communication platform. Missed call text-back, lead pipelines, appointment booking, email and SMS sequences. The backbone of most AI agency setups. White-label friendly — you can brand it as your own platform. \$97–\$297/month. GoHighLevel has a free certification program. Spend your first weekend building a demo account.
2	ManyChat — Social Media Automation Instagram, Facebook, and WhatsApp automation. Auto-reply to comments and DMs, lead capture from social media, FAQ chatbots. Caribbean businesses with active social media accounts see immediate results — every unanswered DM is now handled instantly. \$15–\$45/month.
3	Make (formerly Integromat) — The Glue Visual automation builder connecting apps and workflows. No coding — drag and drop. Connects GoHighLevel, Google Sheets, WhatsApp, email, and hundreds of other tools. Free–\$16/month. Start with GoHighLevel first, graduate to Make for complex multi-system workflows.
4	Calendly or Cal.com — Appointment Booking Automated appointment booking. Eliminates phone tag for consultations, service calls, and estimates. Integrates with GoHighLevel and sends automated reminders. Cal.com is free and open-source. Calendly paid plans from \$8/month.

5

Claude or ChatGPT API — Smart Chatbots

Powers smart chatbots, email drafting, and FAQ responses. Connect through GoHighLevel or Make. A Caribbean restaurant's AI assistant can answer 'what are your hours,' 'do you do catering,' and 'can I book for 20 people' — automatically, 24 hours a day. Usage-based pricing.

6

Zapier — Starter Automation Connector

Simpler automation connector than Make — less powerful but easier to learn first. Good for starter client setups before you graduate to Make for complex workflows. Free—\$20/month.

LEARNING PATH — ONE TOOL AT A TIME

Start with GoHighLevel. It is the most important tool in the stack and covers the majority of what your first clients will need. GoHighLevel has a free certification program and extensive YouTube tutorials. Spend your first weekend building a demo account — set up missed call text-back, a basic lead pipeline, and an appointment booking system. That demo closes your first client. Add ManyChat in week two. Add Make in month two once you have a paying client to justify the learning curve.

CARIBBEAN EARNER PRINCIPLE

Barbados built the Caribbean's most reliable infrastructure through disciplined, methodical investment in foundations. Learn GoHighLevel first. Master it fully. Every other tool in the stack builds on top of that foundation. Depth before breadth.

Your Service Menu

Five automations that sell themselves, priced for recurring monthly income.

Every service you offer should solve a problem the business owner feels right now — not a vague future benefit they have to imagine. The five automations below produce visible, immediate results. When a client sees their first automated text go out to a missed caller within 60 seconds and that caller books an appointment — the retainer conversation is easy.

1	Missed Call Text-Back — Your Hook Service When a business misses a call, an automated text goes out within 60 seconds: 'Hi, sorry we missed your call! We're with a client right now — can I help you via text?' Captures leads that would have called a competitor. Every business misses calls. Every business needs this. Charge \$150–\$300/month to set up and maintain. Use it as your entry-point offer to get in the door.
2	Social Media DM and Comment Automation Instagram and Facebook automations via ManyChat. When someone comments 'price' on a Caribbean catering post, they get an automatic DM with the menu and a booking link. Caribbean businesses with 5,000–20,000 Instagram followers and zero DM automation are leaving bookings on the table every day. Charge \$200–\$400/month to set up and manage.
3	Automated Appointment Booking Connect Calendly or Cal.com to the business website and Google Business Profile. Every 'contact us' interaction becomes an automated booking flow — no phone tag, no back-and-forth. For service businesses that do estimates, consultations, or scheduled appointments, this alone saves 5–10 hours of admin per week. Charge \$150–\$250/month.
4	Lead Follow-Up Sequences A prospect fills out a web form and never hears back for three days. That lead is gone. An automated follow-up sequence — text at 5 minutes, email at 1 hour, text at 24 hours, email at 3 days — recovers 40–60% of leads that would otherwise go cold. Charge \$300–\$500/month for setup and ongoing optimization.

5

AI Customer FAQ Chatbot

A 24/7 chatbot on the business website that answers the 10 most common customer questions — hours, pricing, services, booking process, location. Built with GoHighLevel or a Claude/ChatGPT API connection via Make. Charge \$200–\$400/month to manage and update.

Package	What's Included	Monthly Retainer
Starter	Missed call text-back + basic lead pipeline	\$500/mo
Growth	Starter + social DM + appointment booking	\$800–\$1,000/mo
Full Stack	All 5 automations + monthly reporting	\$1,500–\$2,000/mo
Setup fee (one-time)	Initial build and configuration	\$500–\$1,000

Caribbean Business Owners — Your Warmest First Clients

The community that needs this most and trusts you first.

Every local business needs these automations. But your fastest path to your first paying client is the Caribbean business community in your city. Caribbean restaurants, event planners, cleaning companies, hair salons, and contractors are running sophisticated operations on manual processes — WhatsApp, voicemail, and word of mouth — because no one from their community has ever shown up offering to automate it professionally.

Best Caribbean Business Targets and Why

1	Caribbean Restaurants and Catering Companies High inquiry volume from social media, frequent missed calls during service hours, event bookings that require back-and-forth coordination. A Caribbean catering company getting 30 DMs a week about event packages and answering none of them automatically is your perfect demo client. ManyChat + GoHighLevel appointment booking changes their entire inquiry process within a week.
2	Caribbean Hair Salons and Beauty Businesses Appointment booking is their entire operational challenge. Missed calls during peak hours, Instagram DMs asking about availability, Google reviews that go unanswered. Set up automated booking, DM responses, and a review request sequence after every appointment. One Caribbean salon with 20 clients a day and zero automation is six months of clean monthly retainer income.
3	Caribbean Contractors and Tradespeople Miss calls constantly while on job sites. Leads from Google that never get followed up because the owner is on a roof or under a sink. Missed call text-back alone recovers significant business for these clients. They see immediate ROI and stay for years. The setup is simple. The value is undeniable.

4

Caribbean Event Planners and Party Rental Companies

High seasonal inquiry volume, complex coordination, and significant lead value per booking. An automated inquiry sequence that captures event date, size, and budget — and follows up automatically for 7 days — can recover bookings worth \$2,000–\$10,000 each. The ROI conversation for this client writes itself.

THE COMMUNITY PITCH THAT OPENS EVERY DOOR

'I help Caribbean businesses automate the parts of their operation that are costing them revenue — missed calls, unanswered DMs, slow follow-ups. I set it up and manage it monthly for a flat fee. I want to start with businesses in our community because they are the ones I know and care about most.' That is your opening. It is specific. It is real. And it resonates in a way that a generic agency pitch never will.

Landing Your First Client — The Demo That Closes

Show them what their business looks like with AI. The sale happens in the demo.

Do not pitch features. Do not explain how GoHighLevel works. Build a demo account that shows the client exactly what their business would look like with AI running — and show it to them live. When they see a text go out to a missed caller in 60 seconds during the demo, the conversation shifts from 'what is this' to 'how soon can we start.'

1**Build Your GoHighLevel Demo Account**

GoHighLevel offers a 14-day free trial. Build a demo sub-account named after a fictional Caribbean business — 'Island Clean Co.' or 'Caribbean Events by Mia.' Set up missed call text-back, a basic lead pipeline with three stages, and an appointment booking calendar. This takes 3–4 hours the first time and 45 minutes on every build after that.

2**Record a 3-Minute Loom Demo Video**

Screen record yourself walking through the demo account. Show the missed call text-back firing. Show the lead pipeline. Show the automated follow-up sequence. Narrate what each automation does for the business in plain language — no tech jargon. This video becomes your outreach tool. Send it before every discovery call. Let it pre-sell the meeting before you arrive.

3**The Discovery Call — Three Questions**

How many calls does your business miss per week? What happens to leads who fill out your contact form — how fast do you follow up? Do you have anyone managing your Instagram DMs right now? Three questions. Most owners admit they miss 5–10 calls a week, follow up with leads in 24–48 hours or not at all, and have zero DM management. That is your proposal.

4

The Proposal — Numbers They Can See

'You said you miss about 8 calls a week. If 30% of those callers book with a competitor instead, and your average booking is worth \$200, that's \$96,000 in recovered revenue per year from missed call text-back alone. My Starter package is \$500/month — \$6,000/year. You need to recover one booking per month to break even. Everything after that is profit.' Show the math. The proposal closes itself.

Scaling — From 3 Clients to 30

The systems, the packages, and the income math at scale.

Three clients at \$800/month is \$2,400 recurring — enough to validate the model and build your systems. Ten clients is \$8,000/month — enough to consider this a primary income source. Twenty clients with a standardized delivery system is \$16,000–\$20,000/month — enough to hire an assistant or a delivery contractor and step back from day-to-day management.

1**Standardize Your Onboarding**

Build a repeatable onboarding checklist for each package tier. Starter onboarding takes 4 hours. Growth takes 8. Full Stack takes 12–16. Once the checklist exists, the work is predictable and delegatable. Your first hour with every new client is the same 15-step process every time.

2**Build a Monthly Management Cadence**

Each client gets a monthly 20-minute check-in and a simple performance report — automations fired, leads captured, appointments booked. Template the report. Schedule the calls in batches. Ten client check-ins done in one focused morning per month. The rest of your time is new client acquisition.

3**Upsell Within Your Existing Client Base**

Your Starter clients are your easiest Growth upsells. They already trust you. They already see results. 'Your missed call text-back recovered 12 leads last month. Ready to add the social DM automation so we can capture the Instagram inquiries too?' One conversation per quarter with each Starter client is a pipeline of Growth upgrades.

4**Hire a Delivery Contractor at 15+ Clients**

Find another Caribbean professional who can learn the tools and handle client delivery under your supervision. Pay them \$500–\$800 per client managed. You keep the client relationship and the margin. They do the technical work. This is how the business scales beyond your personal time capacity.

Month	Clients	Avg Retainer	Monthly Revenue
1–2	1–3	\$500–\$800	\$1,500–\$2,400

3–4	4–6	\$600–\$900	\$2,400–\$5,400
6	8–10	\$700–\$1,000	\$5,600–\$10,000
9	12–15	\$800–\$1,200	\$9,600–\$18,000
12	18–25	\$800–\$1,500	\$14,400–\$37,500

Build. Automate. Grow.

Every Caribbean business in your city is missing calls, leaving DMs unanswered, and following up with leads two days late. You now know how to fix all three — automatically — for a monthly fee that pays you while you sleep.

YOUR FIRST 30-DAY ACTION PLAN

Week 1 — Build your GoHighLevel demo

Sign up for the 14-day free trial. Build a demo sub-account with missed call text-back, a lead pipeline, and appointment booking. Record a 3-minute Loom video. This is your sales tool for every conversation.

Week 2 — Identify 5 Caribbean businesses

Search your city for Caribbean restaurants, salons, cleaning companies, and event planners. Check their Instagram — are DMs going unanswered? Those gaps are your pitch. Send your Loom to each one.

Weeks 3–4 — Run discovery calls and close your first client

Run the three-question discovery call. Show the demo live. Present the ROI numbers. Offer the Starter package at \$500/month. One yes. You are now an AI business consultant.
