Dryer Vent Cleaning Blueprint

One Simple Safety Service. Recurring Income. Every Home Needs It.

- 1 Why This Service Sells Itself**
2,900 dryer fires happen every year in the US. The safety pitch writes itself.
- 2 Equipment, Process, and Proof**
Everything you need, how the cleaning works, and how to show clients what you found
- 3 Building a Route of Annual Recurring Clients**
How 50 clients becomes \$30,000/year in guaranteed recurring income
- 4 Finding Your First Clients in the Caribbean Community**
Your warmest market and the referral channels that fill your schedule fast
- 5 Add-On Services and Upsells**
AC vent cleaning, air duct inspection, and maintenance checks that double your job value
- 6 Scaling to a Full Vent Cleaning Business**
Multiple technicians, commercial accounts, and a route that runs without you

INCOME BENCHMARKS

50 clients at \$150/year = \$7,500 · 200 clients = \$30,000/year recurring · add-ons double average job value · low overhead, high margin

Why This Service Sells Itself

2,900 dryer fires happen every year in the US. The safety pitch writes itself.

The US Fire Administration documents approximately 2,900 home dryer fires every year, resulting in 5 deaths, 100 injuries, and \$35 million in property damage. The cause in 34% of cases: failure to clean the dryer vent. When you present this statistic to a Caribbean homeowner — who has children, who has valuables, who has a home they worked decades to own — the decision to book a dryer vent cleaning is not a luxury. It is a safety decision. The pitch writes itself.

2,900

Dryer fires in the US every year · 34% caused by clogged vents · every home with a dryer is a potential annual client

The Business Case — Simple Math

A dryer vent cleaning takes 45–60 minutes. Charge \$100–\$175 per cleaning. At 4 jobs per day, 5 days per week: \$2,000–\$3,500/week in revenue from one technician. The equipment investment is under \$500. The learning curve is one weekend. The recurring revenue structure — every client books again in 12 months — means your income compounds every year you stay in business.

Schedule	Jobs/Day	Rate	Weekly Revenue
Part-time (3 days)	4	\$130 avg	\$1,560
Full-time (5 days)	4	\$130 avg	\$2,600
Full-time + add-ons	4	\$200 avg	\$4,000
2 technicians	8	\$200 avg	\$8,000

Why clients say yes immediately

A clogged dryer vent is a documented fire hazard. You are not selling convenience — you are selling safety. Caribbean homeowners who hear the fire statistic and see the lint you pull from their vent in the first 10 seconds do not haggle on price.

Why clients book again every year

Once a Caribbean homeowner experiences a professional dryer vent cleaning and understands the annual maintenance cycle, they put it on the calendar like an HVAC tune-up. Annual recurring clients are your most valuable business asset.

CARIBBEAN EARNER PRINCIPLE

St. Kitts built its entire financial sector on one founding principle — protect the structure before you grow it. Dryer vent cleaning is about protecting the structure. Every home you service is a home you protect. That is your positioning and your sales pitch in one sentence.

Equipment, Process, and Proof

Everything you need, how the cleaning works, and how to show clients what you found.

The dryer vent cleaning business requires one primary piece of equipment and a vehicle. The process takes 45–60 minutes. The proof you show the client — the lint you extract and display — closes every future referral conversation before you even ask for one.

1**Primary Equipment — Rotary Brush Kit**

A flexible rotary dryer vent cleaning brush kit (Gardus LintEater or equivalent) attaches to a power drill and extends through the full length of the vent duct, dislodging lint as it rotates. Cost: \$60–\$120. Add a shop vacuum for lint extraction and you have everything you need to start. Total starter investment: under \$500.

2**The Cleaning Process**

Disconnect the dryer from the wall. Detach the vent hose from the dryer and the wall duct. Insert the rotary brush from the dryer end and work toward the exterior vent cap. Vacuum all dislodged lint from inside the duct and from around the dryer. Clean the exterior vent cap of any lint or debris. Reconnect all components. Run the dryer for 5 minutes and check airflow at the exterior vent. Strong airflow equals a clean vent.

3**Showing the Client the Proof**

Before you vacuum the dislodged lint, show the client what you extracted. Lay it on a paper towel. Take a photograph. This is your social media content and your referral tool simultaneously. When a client texts their neighbor 'look what came out of my dryer vent' with your business card in the photo, that is the most powerful advertising in this business.

4**The Inspection Report**

Leave every client with a one-page inspection report: date of service, vent length, condition assessment, and next recommended service date 12 months out. The report positions you as a professional, triggers the annual rebooking, and gives the client something to share with their home insurance agent if requested.

STARTER EQUIPMENT LIST — UNDER \$500

Rotary dryer vent cleaning kit (Gardus LintEater): \$80 · Shop vacuum (6-gallon): \$60 · Flexible vent hose replacement stock: \$40 · Exterior vent cap replacements (5 units): \$50 · Inspection report pad (printed): \$20 · Business cards: \$30 · Work gloves and knee pads: \$25 · Branded polo shirt: \$30. Total: \$335. Your first job pays for everything.

Building a Route of Annual Recurring Clients

How 50 clients becomes \$30,000/year in guaranteed recurring income.

The dryer vent cleaning business has a uniquely powerful recurring revenue structure. Once a client has their vent cleaned by you and understands the annual maintenance cycle, they book again without being asked. The business compounds: year one clients plus year two clients plus year three clients all rebooking annually means your income grows every year without adding equivalent marketing effort.

Clients	Annual Rate	Year 1	Year 2	Year 3
50 clients	\$150	\$7,500	\$7,500	\$7,500
100 clients	\$150	\$15,000	\$15,000	\$15,000
200 clients	\$150	\$30,000	\$30,000	\$30,000
200 + add-ons	\$250 avg	\$50,000	\$50,000	\$50,000

The Annual Reminder System

Eleven months after every cleaning, send a text or WhatsApp message: 'Hi [Name], this is [Your Name] from Caribbean Vent Cleaning. It has been almost a year since your dryer vent cleaning. Dryer fires peak in the fall and winter — now is the best time to book your annual service. Reply YES to secure your appointment.' Conversion rate on this message: 70–80% of your existing client base rebooks within 2 weeks.

REMOTE OS PRO — RUN YOUR OPERATION

Remote OS Pro manages your annual recurring client reminders automatically, schedules your route by neighborhood for maximum efficiency, tracks every inspection report, and handles invoicing and payment collection. Route scheduling, client management, recurring reminders, invoicing, and reporting — all automated. Setup fee \$297 · Software access \$1,999 · \$500/month. No trial. No refunds. All sales final.

Finding Your First Clients in the Caribbean Community

Your warmest market and the referral channels that fill your schedule fast.

Caribbean homeowners have the same dryer vent risk as every other homeowner — and they have the same immediate response to the safety pitch. What they have additionally is a cultural trust in Caribbean professionals from their own community. When you introduce yourself as a Caribbean professional offering a documented safety service, the conversion rate is higher than any cold canvassing channel.

1**Caribbean Facebook Groups — The Safety Post**

Post in Caribbean community groups: 'Caribbean homeowners — did you know clogged dryer vents cause 2,900 house fires per year? I am offering professional dryer vent cleaning in [city] at \$130 for Caribbean community members. Takes 45 minutes. I show you what I remove. DM me to book.' This post generates 10–20 direct inquiries in Caribbean groups of 5,000+ members.

2**Door-to-Door in Caribbean Neighborhoods**

Knock doors and offer a free 5-minute dryer vent inspection. 'I am doing free dryer vent inspections in the neighborhood today — no charge to check, \$130 to clean if it needs it.' Free inspection converts to paid cleaning at 40–60% of all doors answered in Caribbean neighborhoods.

3**Caribbean Churches — The Community Endorsement**

Offer to clean the church dryer vents for free in exchange for an announcement to the congregation. The pastor's endorsement generates 15–30 bookings in the following 2 weeks. Carry business cards to every church visit. The referral chain from one church introduction can fill your schedule for a month.

4**Home Service Referral Partnerships**

HVAC technicians, plumbers, and appliance repair technicians regularly encounter homeowners with dryer issues. A referral partnership — you send them HVAC leads, they send you dryer vent cleaning leads — generates mutual referral income with zero marketing cost.

YOUR BUSINESS WEBSITE — PERSONAL NOTE

A professional booking page — showing your services, pricing, and availability — converts clients who find you online into booked jobs without a single cold call. I found it significantly easier to use Lovable — an AI site builder where you describe what you want and it builds a professional site in minutes. No coding required. caribstream.io/lovable

Add-On Services and Upsells

AC vent cleaning, air duct inspection, and maintenance checks that double your job value.

The average dryer vent cleaning job is \$130. The average dryer vent cleaning job with add-ons is \$250–\$300. Every add-on you offer requires minimal additional equipment and leverages the trust you have already established by completing the primary service professionally. Present every add-on during the job — not before — so the client can see you work before they decide to spend more.

1**AC Vent Cleaning — \$75–\$125 Add-On**

After completing the dryer vent cleaning, walk the client to their AC vents: 'While I am here, I can clean your AC supply vents and return air grilles. Dust and allergen buildup in AC vents reduces air quality and system efficiency. Takes 20 minutes. \$75 for the full home.' AC vent cleaning requires a vacuum and a brush attachment — no additional equipment beyond what you already carry.

2**Full Air Duct Inspection — \$100–\$150 Add-On**

A visual inspection of accessible ductwork for gaps, disconnections, and excessive buildup. You are not cleaning the full duct system — you are inspecting and reporting. Deliver a written inspection report with photographs. Caribbean homeowners with older homes respond strongly to a documented air quality assessment.

3**Exterior Vent Cap Replacement — \$50–\$80 Add-On**

Many homes have damaged or improperly installed exterior vent caps that allow pests to enter and reduce airflow efficiency. Carry 3–4 replacement vent caps (\$8–\$12 each). When you identify a damaged cap during the cleaning: 'Your exterior vent cap is damaged and creating a pest entry point. I can replace it right now for \$65.' One in three clients says yes.

4

Annual Maintenance Package — Pre-Pay Discount

Offer a pre-paid annual maintenance package: dryer vent cleaning plus AC vent cleaning plus exterior inspection, billed annually in advance at \$249 instead of \$280 paid separately. Pre-paid packages improve your cash flow, lock in the annual rebooking, and give the client a clear value proposition. Present this at the end of every first visit.

Scaling to a Full Vent Cleaning Business

Multiple technicians, commercial accounts, and a route that runs without you.

The dryer vent cleaning business scales through additional technicians and commercial accounts. A second technician doubles your daily capacity. A laundromat or apartment complex contract adds consistent commercial volume to your residential base. At full scale — 3 technicians plus commercial accounts — Caribbean Vent Cleaning generates \$120,000–\$180,000/year with you managing the business rather than running the route.

1

Your First Technician Hire

Train a Caribbean community member you trust on the full cleaning process. Equipment cost per technician: \$350. Pay per job: \$50–\$70 or hourly at \$18–\$22. You provide the bookings, the equipment, and the quality standards. They complete the service. Your margin per technician-completed job: \$60–\$80. A second technician running 4 jobs per day adds \$1,200–\$1,600/week to your revenue.

2

Laundromat and Apartment Complex Contracts

Laundromats with commercial dryers need professional vent cleaning quarterly. Apartment complexes with in-unit dryers need annual cleaning per unit for fire code compliance. Price: \$75–\$100/unit for apartment complexes on volume contracts. A 100-unit apartment complex at \$85/unit = \$8,500 per annual cleaning cycle.

3

Commercial Client Management With Remote OS Pro

At 100+ recurring clients across multiple technicians, manual scheduling becomes unsustainable. Remote OS Pro handles route scheduling by neighborhood, annual reminder dispatch, technician assignment, inspection report storage, invoicing, and payment collection — all automated. caribstream.io/remoteOS-7X4k9mQ2

CARIBBEAN EARNER PRINCIPLE

Grenada rebuilt its entire economy after Hurricane Ivan devastated 90% of the island in 2004 — not by waiting for perfect conditions but by starting with what was available and building consistently. Your dryer vent business starts with one rotary brush kit and one client. Build consistently. The route compounds every year.

Clean Vents. Prevent Fires. Build Recurring Income.

Every home with a dryer is a potential annual client. Every Caribbean homeowner who hears the fire statistic is a motivated buyer. Every satisfied client is a referral source. The dryer vent cleaning business is simple, safety-driven, and recurring by design.

YOUR FIRST 30-DAY ACTION PLAN

Week 1 — Equipment and setup

Order your rotary brush kit and shop vacuum. Print inspection report pads. Order business cards. Practice the cleaning process on your own dryer vent.

Week 2 — Launch to the Caribbean community

Post the safety pitch in Caribbean Facebook groups. Knock 50 doors in Caribbean neighborhoods with the free inspection offer. Book your first 5 paid jobs.

Week 3–4 — Build toward 50 recurring clients

Complete every job with an inspection report and a 12-month rebooking reminder. Offer the AC vent cleaning add-on on every job. Set up Remote OS Pro for route and reminder management.
