How to charge \$150–\$350 per home visit and grow from there
- 6 Scaling Your Baby Proofing Business**
From weekend jobs to a recurring neighborhood safety service

EARNING BENCHMARKS

\$150–\$350 per home visit · 4 jobs per weekend = \$600–\$1,400 · Caribbean families with new babies are your warmest market · referral rate near 100%

Why Baby Proofing Pays So Well

Parents pay for peace of mind. No service delivers it faster than this one.

When a Caribbean family brings a new baby home, everything changes. The electrical outlets they never thought about suddenly look dangerous. The cabinet under the sink full of cleaning supplies becomes a hazard. The coffee table corner that was just furniture is now a threat. Parents know their home needs to be safer. They do not always know what to fix or how to fix it. That is exactly where you come in — and why they pay without hesitation.

\$350

Average baby proofing job value · completed in 2–3 hours · every new baby in your community is a warm referral · repeat visits as the baby grows

Why Caribbean Families Are Your Best Clients

Caribbean families are multi-generational and community-connected. When a new baby arrives in a Caribbean household, the whole community knows. Grandparents visit. Aunties and uncles visit. Church family visits. Every one of those visitors is a potential referral for your baby proofing service — because every one of them has seen your work in that home and wants the same protection for their grandchildren, nieces, nephews, and godchildren.

What you are doing

Installing safety hardware — cabinet locks, outlet covers, door knob covers, furniture anchors, baby gates, corner guards — throughout the home. You assess every room, identify every hazard, and fix it in a single visit.

What parents are buying

Peace of mind. The certainty that their baby can explore freely without reaching a danger they did not catch. That emotional value is why parents pay happily and refer you to every other new parent they know.

YOUNGBOSSPRINCIPLE

Dominica is called the Nature Isle — one of the most naturally preserved islands in the Caribbean — because the community understood from the beginning that what is most precious must be protected most carefully. Caribbean parents feel the same way about their children. When you protect what they value most, they trust you completely.

What You Actually Do — The Full Service Checklist

Every danger zone in a home and exactly how you fix it.

A professional baby proofing visit covers every room in the home systematically. You are not guessing — you are working through a proven checklist that identifies every hazard category and fixes each one before you leave. A parent who watches you work through their entire home methodically trusts you completely and refers you immediately.

1**Electrical Outlets — Every Room**

Install outlet covers or sliding plate covers on every unused electrical outlet in the home. Standard plastic plug covers cost \$0.25 each and take 5 seconds to install. Sliding plate covers (safer and more permanent) cost \$2–\$4 each. Count every outlet in every room before you quote the job — a 4-bedroom home may have 40–60 outlets to cover.

2**Cabinet Locks — Kitchen and Bathrooms**

Install magnetic or spring-loaded cabinet locks on every cabinet a baby can reach — especially under the kitchen sink (cleaning products), bathroom cabinets (medications, cosmetics), and any cabinet containing sharp objects. Magnetic locks are invisible from outside and child-proof even for older toddlers. Cost: \$2–\$5 per cabinet.

3**Furniture Anchoring — Tip-Over Prevention**

Anchor every tall piece of furniture to the wall — bookshelves, dressers, TV stands, wardrobes. A toddler who climbs a bookshelf that tips over is a life-threatening emergency. Use L-brackets and wall anchors (\$3–\$8 per piece of furniture). This is the highest-impact safety installation in any home with a mobile baby — and the one parents are most grateful for.

4**Baby Gates — Stairs and Hazard Zones**

Install hardware-mounted baby gates at the top and bottom of every staircase and at the entrance to any hazard zone (kitchen during cooking, home office, laundry room). Hardware-mounted gates (secured with screws into the wall) are the only safe option for stair tops. Pressure-mounted gates are acceptable for blocking room entrances. Installation: 15–30 minutes per gate.

5**Corner and Edge Guards — Living Room Furniture**

Apply foam corner guards to every sharp furniture corner a baby can reach — coffee tables, TV stands, fireplace hearths, kitchen island corners. Self-adhesive foam guards cost \$0.50–\$1.50 each. A standard living room has 15–25 corners to address. Clear guards are least visible and most popular with Caribbean parents who care about their home's appearance.

6**Door and Window Safety**

Install door pinch guards on every interior door hinge to prevent finger injuries. Add door knob covers where needed to prevent babies from opening doors to hazard areas. Install window stops or window guards on second-floor windows to prevent falls. Each of these items costs \$2–\$8 and takes under 5 minutes to install.

YOUR SAFETY CHECKLIST — RUN THIS EVERY JOB

Electrical outlets covered · Cabinet locks installed (kitchen + bathrooms) · Furniture anchored to walls · Baby gates at stairs · Corner and edge guards applied · Door pinch guards installed · Window stops in place · Toilet lock installed · Stove knob covers in place · Blind cord wrap-ups installed. Leave a completed checklist with every client — it is your professional deliverable and your referral tool.

Your Equipment and Supplies

Everything you need to start for under \$150.

Baby proofing requires a small toolkit and a supply kit. You purchase the safety hardware yourself and mark it up 30–50% when billing the client, or you can charge a flat supply fee per job. Either way, your material cost on a standard job is \$40–\$80 and you charge \$150–\$350 for the complete service.

Item	Purpose	Cost Each	Qty to Stock
Outlet plug covers	Electrical safety	\$0.25	50
Magnetic cabinet locks	Cabinet safety	\$3.50	20
Furniture L-brackets + anchors	Tip-over prevention	\$5.00	15 sets
Foam corner guards (clear)	Edge safety	\$1.00	40
Door pinch guards	Finger safety	\$4.00	10
Window stops	Fall prevention	\$6.00	8
Toilet lock	Drowning prevention	\$8.00	4
Stove knob covers	Burn prevention	\$3.00	6
Blind cord wraps	Strangulation prevention	\$4.00	8
TOTAL STARTER STOCK			~\$150

Tools You Need

Drill and drill bits (\$30–\$80 if you do not already own one). Phillips and flathead screwdrivers. Level for gate installation. Stud finder for furniture anchoring. Measuring tape. A carrying bag or small toolbox for your supplies. Total tool investment if starting from scratch: \$60–\$120. Most Caribbean young people have access to a family drill — ask before you buy.

Finding Your First Clients in the Caribbean Community

Where to find new parents and how to start the safety conversation.

New parents in the Caribbean community are easy to identify and easy to approach — the community celebrates new babies loudly and joyfully. Baby showers, church baby blessings, neighborhood congratulations. Every new baby announcement in your Caribbean community is an opportunity to introduce your baby proofing service at exactly the right moment — when the parents are thinking about safety and the home is about to need it.

1**Caribbean Facebook Groups and WhatsApp — New Baby Announcements**

Post in Caribbean community groups: 'Congratulations to all the new parents in our community! I offer professional baby proofing services for Caribbean families in [city] — outlet covers, cabinet locks, furniture anchoring, baby gates, and corner guards. Complete home safety visit from \$150. DM me.' Every baby announcement post in a Caribbean group is your cue to post your service.

2**Caribbean Baby Showers — The Perfect Entry Point**

Ask a family member or friend hosting a Caribbean baby shower if you can leave your cards or offer a baby proofing gift certificate as a shower gift option. A \$50 baby proofing credit makes a practical, thoughtful shower gift — and introduces your service to every parent and grandparent in the room. One baby shower introduction generates 3–6 bookings from attendees who have their own grandchildren or nieces and nephews.

3**Caribbean Pediatric Offices and Daycares**

Ask Caribbean pediatric offices and Caribbean-owned daycares if you can leave your flyers in their waiting rooms. Parents bringing newborns for their first checkups are thinking about baby safety. A flyer that says 'Professional Baby Proofing — Caribbean Families Welcome — Starting at \$150' in a pediatric waiting room reaches the exact parent at the exact right moment.

4

Church Baby Blessings and Christenings

Caribbean churches celebrate new babies with community ceremonies. Approach the pastor or church coordinator about introducing your service to families celebrating new arrivals. One church introduction generates 4–8 bookings from congregation families with new babies or young grandchildren.

YOUR BUSINESS WEBSITE — PERSONAL NOTE

A simple booking page makes you look professional and gets clients to take you seriously. Build yours fast with Lovable — an AI site builder where you describe what you want and it builds a professional site in minutes. No coding required. caribstream.io/lovable

Pricing, Packages, and Upsells

How to charge \$150–\$350 per home visit and grow from there.

Baby proofing pricing is straightforward — you charge for your labor and your materials. The professional value you deliver (a systematically assessed and secured home) justifies a rate that is far higher than a simple handyman visit. Parents who understand what you are doing and why it matters do not negotiate on price.

Package	What's Included	Price
Starter — Apartment	Outlets, cabinets, corners (1–2 bed apt)	\$150–\$200
Standard — Family Home	Full checklist, all rooms, 3–4 bedrooms	\$250–\$350
Premium — Full Safety Audit	Standard + written safety report + 6-month follow-up visit	\$400–\$500
6-Month Follow-Up Visit	Re-assess as baby becomes mobile	\$75–\$100
Additional gates (per gate)	Hardware-mounted stair gate install	\$50–\$75 each

The 6-Month Return Visit — Built-In Recurring Income

A baby who cannot crawl today will be pulling up on furniture in 4 months and climbing bookshelves in 8. Every client you serve today is a return visit client in 6 months when their baby reaches the next mobility stage. Schedule the return visit before you leave the first job. 'I will follow up in 6 months as your baby starts walking — new hazards emerge and we will re-assess everything.' That one sentence creates a recurring revenue calendar from your very first client.

Scaling Your Baby Proofing Business

From weekend jobs to a recurring neighborhood safety service.

Baby proofing scales through referrals, partnerships, and return visits. The Caribbean community referral rate for this service is close to 100% — every satisfied parent tells every other parent they know. At 4 jobs per weekend your first month, you are generating \$600–\$1,400 per weekend. At 8 jobs per weekend with a partner helping on larger homes, you double that.

1**Referral Program — Make It Automatic**

Tell every client at the end of every job: 'If you refer a friend and they book a visit, I will give you \$25 off your 6-month return visit.' This single statement turns every satisfied client into an active referral source. In a Caribbean community where new baby news travels instantly, one planted referral seed generates 3–5 direct bookings within 30 days.

2**Partner With a Caribbean Doula or Midwife**

Caribbean doulas and midwives serve new parents in the exact window when baby proofing becomes urgent. A referral partnership — they recommend your service to every family approaching their due date, you give them a \$30 referral fee per booking — generates a consistent stream of warm leads from the most trusted professional in a new parent's life.

3**Expand to General Home Safety Audits**

After 20 baby proofing jobs you have the safety assessment skills to offer general home safety audits for elderly Caribbean community members — grab bars in bathrooms, non-slip mats, improved lighting. The skill set transfers directly. The community access is the same. The service price is similar. Two income streams from one set of skills.

YOUNGBOSSPRINCIPLE

Tobago has one of the oldest protected coral reefs in the Western Hemisphere — preserved because the community understood that protecting something valuable requires consistent, careful attention over time. Your baby proofing business works the same way. Every home you protect carefully generates the referrals that protect your income over time.

Protect Homes. Protect Children. Build Your Business.

Every new baby in your Caribbean community is a potential client. Every satisfied parent is a guaranteed referral source. Baby proofing is one of the most referral-rich businesses a young Caribbean professional can start — because parents never stop talking about who keeps their children safe.

YOUR FIRST 30-DAY ACTION PLAN

Week 1 — Stock your supply kit

Order your starter supply kit from Amazon. Get your drill and basic tools. Print your safety checklist. Practice installing each item type at home.

Week 2 — Find your first 3 clients

Post in Caribbean Facebook groups. Tell family members and church community about your service. Offer your first 3 jobs at \$125 in exchange for testimonials and referrals.

Week 3 — First paying jobs

Complete your first jobs. Document with before-and-after photos. Schedule 6-month return visits before you leave. Ask every client for one referral.

Week 4 — Build your referral network

Contact one Caribbean pediatric office and one doula about a referral partnership. Set up your booking page at caribstream.io/lovable.
