EARNING BENCHMARKS

\$100–\$200 per pool per month · 15 pools = \$1,500–\$3,000/month recurring · Caribbean homeowners with pools need reliable weekly service · referral rate from satisfied pool clients near 100%

Why Pool Cleaning Is One of the Best Recurring Service Businesses

Weekly contracts. Monthly income. Caribbean homeowners need reliable service.

A swimming pool requires professional maintenance every single week without fail — not occasionally, not when the owner remembers to call, but every week on a set schedule. The water chemistry must be balanced. The walls and floor must be brushed. The skimmer baskets must be emptied. The filter must be maintained. A pool that misses two consecutive weekly services turns green and costs the owner \$300–\$500 to restore. That urgency is your business stability — a pool owner who has found a reliable, knowledgeable service professional does not cancel, does not shop for a lower price, and does not miss a payment.

\$2,000/mo

15 pools × \$135 avg monthly contract · weekly visits · Caribbean homeowners with pools
are premium clients · zero churn once trust is established

Why Caribbean Pool Owners Are Your Best Clients

Caribbean families who own pools in the diaspora invested significantly in that pool as a statement of Caribbean outdoor living culture. The pool is used for family gatherings, Caribbean weekend cookouts, and children's entertainment from Memorial Day to Labor Day. A Caribbean homeowner whose pool turns green the weekend before a planned family cookout experiences real distress — and the reliable pool cleaner who keeps that from ever happening becomes a trusted service professional for years.

What makes this business stable

Weekly necessity, not discretionary spending. A pool owner cannot skip pool maintenance the way they can skip lawn mowing for a week. Green water is visible, embarrassing, and expensive to fix. Reliability earns you a client for life.

What makes it scale efficiently

A 2-hour round trip covers 4–6 pools on a well-optimized route. At 4 pools per route and \$35 per pool visit, one 2-hour morning route earns \$140. Three morning routes per week on the same route: \$420/week from 12–18 pools.

YOUNGBOSSPRINCIPLE

The Cayman Islands built one of the world's strongest financial economies from a small island — not through resources but through reliability, trust, and consistent professional excellence. Your pool cleaning business is built on exactly those three things. Show up every week. Do the job right. Build the trust that makes clients stay for years.

The Technical Skills — What You Need to Know Before Your First Pool

Water chemistry, equipment, and the weekly process that keeps pools safe.

Pool cleaning is a learnable technical skill. The fundamentals — water chemistry, filtration systems, and cleaning equipment operation — can be learned from free online resources in a single weekend of focused study. The hands-on skill development happens quickly with practice. By your fifth pool you are efficient. By your twentieth you are professional.

1

Water Chemistry — The Foundation

Pool water must be balanced to be safe to swim in and to prevent damage to pool surfaces and equipment. The five parameters to test and maintain: pH (7.2–7.6 ideal), Total Alkalinity (80–120 ppm), Free Chlorine (1–3 ppm), Cyanuric Acid/Stabilizer (30–50 ppm), Calcium Hardness (200–400 ppm). Test strips (or a digital tester) measure all five in 60 seconds. Chemistry adjustments are made by adding specific chemicals to bring each parameter into range.

2

The Weekly Cleaning Process

Every weekly pool visit covers five tasks in order: (1) Test water chemistry and add necessary chemicals. (2) Empty skimmer baskets and pump basket. (3) Net out debris — leaves, insects, and surface material. (4) Brush pool walls, steps, and corners to prevent algae buildup. (5) Vacuum pool floor using manual vacuum or automatic pool cleaner. (6) Check all equipment — pump, filter, heater — for proper operation. Total time per pool: 30–60 minutes depending on pool size and condition.

3

Filtration Systems — Know the Three Types

Sand filters: backwash monthly, replace sand every 5–7 years. Cartridge filters: clean monthly, replace annually. DE (diatomaceous earth) filters: backwash as needed, recharge with fresh DE after backwash. Know which system each of your clients has and maintain it on schedule. Filter maintenance is the single most important factor in pool water clarity — a neglected filter causes more pool problems than any other missed maintenance task.

4

Algae — Prevention and Treatment

Green algae blooms from insufficient chlorine or poor circulation. Black algae requires aggressive brushing and specialized algaecides. Mustard/yellow algae is resistant to normal chlorine levels. Prevention is 100x easier than treatment: maintain proper chlorine levels, brush walls weekly, and run the pump for 8–12 hours per day. Your weekly service prevents algae. When you inherit a green pool from a neglected client, quote a restoration service (\$150–\$300) before starting the weekly contract.

FREE LEARNING RESOURCES — COMPLETE THEM BEFORE YOUR FIRST POOL

YouTube: 'Pool School by In the Swim' — complete beginner series. YouTube: 'The Pool Guy' — weekly maintenance walkthroughs. PoolSchool.intheswim.com — free comprehensive written guides. Complete these resources before your first client. Arrive at your first pool knowing more about pool chemistry than the homeowner who has owned it for 10 years. That knowledge gap is your value.

Equipment and Chemicals — Your Starter Kit

Everything you need to service your first pool for under \$300.

Pool cleaning equipment is straightforward and affordable. Your starter kit covers the tools for every weekly maintenance task. As your client base grows, the equipment pays for itself within the first month of service.

Equipment	Purpose	Cost
Telescoping pole (16 ft)	Base for all brush and vacuum attachments	\$25–\$40
Pool brush (18-inch nylon)	Wall and floor brushing	\$15–\$25
Leaf net/skimmer attachment	Surface debris removal	\$15–\$20
Manual vacuum head + hose	Pool floor vacuuming	\$35–\$60
Test strips or digital tester	Water chemistry testing	\$20–\$50
Chlorine tablets + granular shock	Primary sanitizer	\$40–\$60 (30-day supply)
pH Up and pH Down	pH adjustment chemicals	\$15–\$25
Alkalinity increaser	Alkalinity adjustment	\$10–\$15
Algaecide (maintenance dose)	Algae prevention	\$15–\$20
Bucket and carrying bag	Chemical and tool transport	\$15–\$25
TOTAL STARTER KIT		\$205–\$340

Chemical Pricing Strategy

Two approaches: include chemicals in your monthly service fee, or charge for chemicals separately at cost plus 30–50% markup. The all-inclusive model is simpler for clients and commands a higher monthly rate (\$150–\$200 vs \$100–\$130 for labor only). The separate chemical billing model gives you flexibility when chemical prices fluctuate. For your first 5 clients, use the all-inclusive model to keep the pricing conversation simple.

Finding Your First Clients in the Caribbean Community

Where Caribbean pool owners are and how to land your first weekly contracts.

Caribbean homeowners with pools live in specific neighborhoods — warmer-climate suburbs and in diaspora cities with longer swimming seasons (Florida, Georgia, Texas, California, parts of New York and New Jersey). Your first pool clients are in those neighborhoods. They are Caribbean families who moved to homes with pools or added pools to their properties — and who are paying a pool company \$150–\$250/month for service they are not confident is being done correctly.

1**Caribbean Facebook Groups — The Targeted Offer**

Post in Caribbean community groups in pool-owning neighborhoods: 'Caribbean homeowners with pools in [area] — I offer professional weekly pool maintenance including chemical balancing, brushing, vacuuming, and equipment checks. Starting at \$130/month for a standard pool. Free water test included with your first visit. DM me.' Caribbean pool owners who see this post from a Caribbean young person in their community call before they shop around.

2**Door Knocking in Pool-Rich Neighborhoods**

Drive or walk through Caribbean suburban neighborhoods and identify homes with pools — pool equipment visible over fences, pool fence visible from the street, pool supply delivery vehicles. Knock on the door: 'Hi, I am starting a pool cleaning service in this neighborhood. I offer weekly maintenance at \$130–\$150/month all inclusive. Can I do a free water test to show you what your pool chemistry looks like right now?' Free water tests convert to monthly contracts at 40–60%.

3**Nextdoor — Pool Service Requests**

Pool service requests appear on Nextdoor regularly — homeowners asking for recommendations, new pool owners looking for a service, dissatisfied clients looking to switch from their current company. Monitor Nextdoor daily in neighborhoods with pools. Respond to every pool-related post immediately. Your response speed is the primary differentiator when multiple service providers respond to the same Nextdoor request.

4

Referrals From Your First Clients

After your first 3 pool clients are happy with 4 consecutive weeks of service, ask each one directly: 'Do you know any other Caribbean families with pools who might need reliable weekly service? I offer you a free week of service for every referral that becomes a monthly client.' Caribbean homeowners in pool-rich suburban neighborhoods know their neighbors — and know who has a pool.

YOUR BUSINESS WEBSITE — PERSONAL NOTE

A simple booking page makes you look professional and gets clients to take you seriously. Build yours fast with Lovable — an AI site builder where you describe what you want and it builds a professional site in minutes. No coding required. caribstream.io/lovable

Pricing Your Service — Weekly Routes and Monthly Contracts

How to charge \$100–\$200 per pool per month and build a route that pays well.

Pool cleaning pricing is monthly, not per-visit. Collect the full month in advance on the 1st. This creates the most favorable cash flow structure in any service business — your income arrives before you do a single day of work that month. A client who pays monthly in advance is also far less likely to cancel impulsively than one who pays per visit.

Pool Size	Monthly Rate (labor only)	Monthly Rate (all-inclusive)	Per Visit
Small (up to 10,000 gal)	\$90–\$110	\$120–\$150	\$30–\$40
Standard (10–20,000 gal)	\$110–\$140	\$145–\$180	\$35–\$45
Large (20–30,000 gal)	\$140–\$170	\$175–\$220	\$45–\$55
Pool restoration (green water)	N/A — flat fee	\$150–\$350 one-time	N/A
Pool opening (spring)	N/A — flat fee	\$150–\$250 one-time	N/A
Pool closing (fall)	N/A — flat fee	\$100–\$200 one-time	N/A

Building Your Route — Efficiency Is Income

Group your pool clients geographically into routes. A route of 5 pools within a 10-minute driving radius takes 3–4 hours to complete including driving time. At \$35 average per pool visit for all-inclusive monthly clients, one route earns \$175 for a half-day of work. Three routes per week across 15 pools earns \$525/week — \$2,100/month — from a 3-day part-time schedule.

Scaling to a Full Pool Service Company

Multiple technicians, additional services, and commercial accounts.

The pool cleaning business scales efficiently because the core service is teachable, the routes are geographic, and the additional services (repairs, equipment installation, pool openings and closings) command premium pricing that increases revenue per client without adding new clients.

1

Your First Pool Technician

Once your monthly client base exceeds 15 pools, hire and train a pool technician to handle one or two of your routes independently. Pay \$15–\$18/hour or \$30–\$35 per pool visit. You handle client relationships, chemical purchasing, and quality checks. They handle the weekly route visits. Your margin per technician-completed visit: \$5–\$15. At 15 technician-completed visits per week: \$75–\$225/week in passive income.

2

Equipment Repair and Replacement — Premium Upsells

Learn basic pool equipment troubleshooting: pump motor replacement (\$150–\$300 labor), filter cleaning and cartridge replacement (\$50–\$100 labor), pool light replacement (\$75–\$150 labor). These repairs generate \$75–\$300 per service call from existing clients who already trust you. A pool technician who can diagnose and fix equipment problems earns 2–3x more per hour than one who can only clean.

3

Commercial Accounts — Hotels and Apartment Complexes

Hotels with pools, apartment complexes with community pools, and community HOAs with shared pools all require professional weekly maintenance. Commercial pool contracts pay \$300–\$800/month per pool depending on pool size and usage. One hotel with 2 pools on a monthly contract generates \$600–\$1,600/month from a single commercial relationship. Commercial pools renew annually and refer sister properties automatically when service quality is consistent.

Scale	Pools	Monthly Revenue	Net (60% margin)
Solo — 10 pools	10	\$1,400–\$1,800	\$840–\$1,080

Solo — 20 pools	20	\$2,800–\$3,600	\$1,680–\$2,160
1 technician — 30 pools	30	\$4,200–\$5,400	\$2,520–\$3,240
2 technicians + commercial	40+	\$7,000–\$10,000	\$4,200–\$6,000

YOUNGBOSSPRINCIPLE

Barbados built the Caribbean's most consistent infrastructure through one unbreakable principle: show up, do the work correctly, and build the kind of reliability that makes people trust you with things that matter to them. A pool is one of the most expensive investments a Caribbean homeowner makes in their property. When you show up every single week and keep that investment clean, safe, and beautiful — you become irreplaceable.

Keep It Clean. Keep It Blue. Build Your Pool Business.

Every Caribbean homeowner with a pool needs reliable weekly service. Every pool that turns green is a client opportunity. Every satisfied pool client refers the next-door neighbor before the summer ends. Pool cleaning rewards reliability, technical knowledge, and the community trust that Caribbean young people build naturally.

YOUR FIRST 30-DAY ACTION PLAN

Week 1 — Learn the basics

Complete the Pool School by In the Swim YouTube series. Order your starter kit. Practice water chemistry testing on a family member's pool or a neighbor's pool for free.

Week 2 — Free water tests

Offer free water tests to 10 Caribbean homeowners with pools in your area. Show them their chemistry results. Propose your monthly service package.

Week 3 — First monthly contracts

Convert 3 free water test clients to monthly contracts. Complete your first 3 weekly visits to each. Document your service with photos.

Week 4 — Build your route

Target 10 monthly clients by end of month one. Ask every satisfied client for one referral. Set up your booking page at caribstream.io/lovable.
