Google Visibility Blueprint

Help Local Businesses Get Found. Get Paid Every Month.

1 The Opportunity

Half of local businesses are invisible on Google. In the Caribbean diaspora, the number is even higher.

2 What the Service Actually Is

Google Business Profile optimization — what you do, what it fixes, and what clients see change

3 The Full Audit Process

Your client deliverable — the complete 15-point optimization checklist

4 Finding Clients

Starting with the Caribbean community. Expanding from there.

5 Pricing and Packaging

One-time setup, monthly retainer, and how to structure both for maximum recurring income

6 Scaling — Building Real Recurring Revenue

From 3 clients to 30 — the systems that make it manageable

INCOME BENCHMARKS

10 clients at \$250/month = \$2,500 MRR · Setup fee \$250–\$500 per client · Caribbean community is your warmest market · 56% of local businesses have incomplete Google profiles

The Opportunity

Half of local businesses are invisible on Google. That is your opening.

Only 44% of Google Business Profiles are fully optimized. A complete, well-maintained profile generates seven times more clicks than an incomplete one. More than half the local businesses in any city — the plumbers, the dentists, the Caribbean caterers, the hair salons, the cleaning companies — are leaving the single largest source of local customers half-switched off. Not because they do not care. Because they do not know, and they do not have time to learn. They are running the business. That gap is where you come in.

7x

More clicks for a fully optimized Google Business Profile vs incomplete · 56% of local businesses still have incomplete profiles

Why Caribbean Businesses Are the Perfect Starting Point

Caribbean-owned businesses in diaspora cities operate almost entirely on word of mouth. The Jamaican restaurant in Brooklyn. The Trinidadian cleaning company in Toronto. The Bajan event planner in London. These businesses have loyal customers but near-zero Google presence. Their competitors — generic companies — rank above them on Google simply because they have a complete profile and Caribbean businesses do not. You have access to these business owners. You share the same community. Your first ten clients are people you already know or are one introduction away from.

What you fix

Incomplete profiles. Missing categories. No photos. No posts. Incorrect hours. Unanswered reviews. Missing service descriptions. These are all solvable in a single weekend of work per client.

What the client sees

More calls. More direction requests. More website clicks. More reviews. More visibility in the Google Maps 3-pack. Results they can see in their phone within weeks of your work going live.

CARIBBEANEARNERPRINCIPLE

The Cayman Islands built a global financial services industry by serving clients other institutions overlooked. Caribbean businesses are invisible on Google not because they are inferior — but because no one from their community has ever sat down and fixed their profile. You are that person.

What the Service Actually Is

What you do, what it fixes, and what clients see change.

Google Business Profile optimization is the process of completing, enhancing, and maintaining a business's Google listing so it appears prominently when local customers search for that business's service. Google gives significant ranking weight to profiles that are complete, accurate, active, and regularly updated. Most businesses set theirs up once and never touch it again. That neglect is your service.

1	Profile Completion and Accuracy Business name, category, address, phone number, website, hours — all accurate and consistent with what appears everywhere else on the internet. Inconsistency between Google, Yelp, and the business website confuses Google's algorithm and suppresses rankings. You fix every inconsistency. This alone moves the needle.
2	Photo and Visual Optimization Businesses with photos receive 42% more direction requests and 35% more website clicks than those without. You add professional-quality photos — exterior, interior, team, products, food, work samples. For Caribbean businesses this is especially impactful because their visual identity is a competitive differentiator.
3	Review Strategy and Response Management Reviews are one of the highest-weight ranking signals for local search. You set up a system for the business to consistently request reviews — a QR code at the counter, a follow-up text after service, a link in email receipts. You also respond to every existing review, positive and negative, in the business's voice.
4	Google Posts and Service Descriptions Google Posts are short updates — offers, events, news — that appear directly on the business profile in search results. Most businesses never use them. You publish two to four posts per month for each client. Service descriptions are written with natural keywords that match what local customers actually search.

Q&A; Management and Caribbean Attributes

Google allows customers to ask questions directly on a business profile. You monitor and answer these. You also complete every applicable attribute — 'Caribbean-owned,' 'Black-owned,' 'women-led,' 'outdoor seating' — these attributes appear in filtered searches and connect the profile to motivated community-loyal customers.

The Full Audit Process

Your client deliverable — the complete optimization checklist.

Every client engagement starts with an audit. The audit shows the client exactly what is missing, what it is costing them, and what you are going to fix. It is your proof of need and your scope of work in one document. Run this audit for free as your prospecting tool — show the business owner their incomplete score before you pitch your service. The audit sells itself.

Audit Item	Priority	Impact
Business name matches real-world signage	HIGH	Trust and consistency signal
Primary and secondary categories correct	HIGH	Determines what searches you appear for
Address, phone, website 100% accurate	HIGH	NAP consistency — core ranking signal
Minimum 10 photos — all categories	HIGH	42% more direction requests with photos
Business description with natural keywords	HIGH	Tells Google and customers what you do
All existing reviews responded to	HIGH	Active engagement signal to Google
Review request system in place	HIGH	Ongoing ranking improvement
Google Post published within last 7 days	MEDIUM	Active profile signal
All services listed with descriptions and prices	MEDIUM	Matches long-tail search queries
Caribbean-owned / Black-owned attributes enabled	MEDIUM	Connects to community-loyal customers
Q&A; section monitored and answered	MEDIUM	Customer engagement signal
Profile verified by Google	HIGH	Required for full feature access
Website link working and mobile-optimized	HIGH	Destination quality signal

THE AUDIT AS A SALES TOOL

Run this audit on a potential client's profile before you approach them. Score it out of 13. If they score below 7 — and most Caribbean businesses score 3 or 4 — you walk in with documented proof of exactly what they are missing and exactly what it is costing them. The audit is free. The optimization is what they pay for.

Finding Clients

Starting with the Caribbean community. Expanding from there.

Your first ten clients should come from the Caribbean community in your city. Not because you cannot serve other businesses — you absolutely can, and eventually most of your clients will be outside the community. But because the Caribbean community gives you warm access, cultural trust, and a faster path to your first paid engagement than any cold outreach strategy.

1	Search Google for Caribbean Businesses in Your City Search 'Caribbean restaurant [city],' 'Caribbean cleaning [city],' 'Caribbean hair salon [city].' Look at their Google profiles in the results. Most will have incomplete profiles, few photos, and no recent posts. Screenshot the worst ones. These are your prospects.
2	Caribbean Facebook Groups and Community Pages Every diaspora city has Caribbean community Facebook groups. Post introducing your service — 'I help Caribbean businesses get found on Google — free audit for the first five' — will generate enquiries immediately.
3	Caribbean Events and Community Gatherings Carnival events, Caribbean food festivals, cultural celebrations, church events — these gatherings concentrate Caribbean business owners in one place. Attend with business cards. Offer a free audit on the spot. Your target client is the caterer, the DJ, the hair braider, the event planner working that same event.
4	Expanding Beyond the Caribbean Community Once you have five paying clients and documented results — before and after screenshots, review count increases, call volume data — you have a portfolio. Any local business in any niche is now a potential client. You cold email with the audit attached. The Caribbean community gave you proof. The wider market pays for the skill.

CARIBBEAN EARNER PRINCIPLE

Antigua's Sailing Week became a global institution because the Caribbean community built it from the inside — local knowledge, local investment, local pride, global reach. Your client base starts local and reaches anywhere. Build from the inside first.

Pricing and Packaging Your Service

One-time setup. Monthly retainer. Both matter.

Pricing in this service has two components and you need to offer both. A one-time setup fee for the initial optimization work — this is where you do the heavy lifting. And a monthly retainer for ongoing management — posts, review responses, photo additions, Q&A; monitoring, and reporting. The setup pays you once. The retainer pays you every month without doing the setup work again.

Service	What's Included	Price
Initial Audit (free)	Full 15-point profile audit with score and gap analysis	Free
One-Time Setup	Complete profile rebuild — all checklist items, photos, descriptions, categories, attributes, review system	\$250–\$500
Monthly Management — Basic	2 Google Posts/month, review responses, Q&A; monitoring, monthly report	\$150–\$200/mo
Monthly Management — Growth	4 posts/month, review strategy, photo updates, competitor monitoring, monthly report	\$250–\$350/mo
Caribbean Community Bundle	Setup + 3 months management — best value for first-time clients	\$500–\$800

THE INCOME MATH THAT SCALES

Ten clients paying \$250/month is \$2,500 recurring monthly income. At two to three hours of work per client per month, that is 20–30 hours total — manageable alongside a full-time job. Twenty clients is \$5,000/month. Thirty clients, if you systemize the reporting and posting, is a full-time income built entirely on a skill that takes a weekend to learn and improves with every client you serve.

Scaling — Building Real Recurring Revenue

From 3 clients to 30 — the systems that make it manageable.

The Google Visibility business scales through systems. Templates, scheduling tools, and a standardized monthly workflow reduce the per-client time from three hours to under one hour as you become more efficient. Each client retained is income that arrives without re-selling.

1	Week 1 — Create and Schedule Monthly Google Posts Write four posts per client using a rotating template: one offer, one behind-the-scenes, one review highlight, one cultural or community connection for Caribbean businesses. All four clients' posts for the month — done in two hours.
2	Week 2 — Review Monitoring and Response Check every client's profile for new reviews. Respond to all of them within 48 hours in the business's voice. For negative reviews, draft a response and confirm with the client before posting. This is the task clients value most.
3	Week 3 — Photo and Content Updates Request new photos from the client via WhatsApp or text — 'Any new dishes, team photos, or event shots this month?' Add them to the profile. Fresh photos every month signal an active business to Google.
4	Week 4 — Monthly Report and Client Check-In Pull the Google Business Profile insights — profile views, search queries, calls, direction requests. Compare to last month. Send a one-page PDF report. Clients who see the numbers stay. This report is your retention tool.

Stage	Clients	Hours/Month	Monthly Revenue
Starting	3	9 hours	\$750
Building	10	20–30 hours	\$2,500
Established	20	30–40 hours	\$5,000
Scaled (systemized)	30	35–45 hours	\$7,500

Help Local Businesses Get Found. Get Paid.

The skill takes a weekend to learn. The first client is one community conversation away. The income is recurring from day one. The only step between you and your first \$250/month is running a free audit for someone who already needs it.

YOUR FIRST 30-DAY ACTION PLAN

Week 1 — Run 5 free audits

Search Caribbean businesses in your city. Score their profiles against the 15-point checklist. Send the results with a brief message: 'I ran a free audit on your Google profile — here is what I found.' No pitch. Just the audit. Let the score do the talking.

Week 2 — Convert one to a paid client

Follow up on the audits. Offer the setup for \$300 and three months of management for \$150/month. One yes is \$750 in the first 30 days from a service that costs nothing to deliver beyond your time.

Week 3–4 — Deliver results and document them

Complete the first client's optimization. Screenshot the before. Screenshot the after. Pull the first month's insights. Send the report. That before-and-after is your portfolio for every conversation after this one.
