Dryer Vent Cleaning Blueprint

One Simple Safety Service. Recurring Income. Every Home Needs It.

1 Why This Service Sells Itself

The safety pitch writes itself — and 2,900 dryer fires happen every year in the US

2 Equipment, Process, and Proof

Everything you need, how the cleaning works, and how to show the client what you found

3 Building a Route of Annual Recurring Clients

How 50 clients becomes \$30,000/year in guaranteed recurring service income

4 Finding Your First Clients in the Caribbean Community

Your warmest market and the referral channels that fill your schedule fast

5 Add-On Services and Upsells

AC vent cleaning, air duct inspection, and dryer maintenance checks that double your job value

6 Scaling to a Multi-Service Home Safety Business

From solo operator to team with commercial accounts

INCOME BENCHMARKS

Solo operator: \$150–\$250 per cleaning · 4–6 cleanings/day · 50 annual clients =
\$7,500–\$12,500/year recurring guaranteed · Caribbean community referral rate highest of
any home service

Why This Service Sells Itself

The safety pitch writes itself. 2,900 dryer fires happen every year in the US.

The US Fire Administration documents approximately 2,900 home dryer fires every year, resulting in 5 deaths, 100 injuries, and \$35 million in property damage annually. The leading cause in 34% of those fires: failure to clean the dryer vent. When you walk up to a Caribbean homeowner's door and open with that statistic — before you say anything about price — the conversation is already won. You are not selling a cleaning service. You are selling fire prevention. And every homeowner in America needs their dryer vent cleaned every 12–18 months.

2,900

Dryer fires per year in the US · 34% caused by failure to clean dryer vent · Every home needs this service every 12–18 months

The safety pitch

Your dryer vent should be cleaned every 12–18 months to prevent fire risk. Most homeowners have never had it done. I clean it professionally in under an hour and show you what I remove before and after. \$150.

Why clients pay easily

They were not planning to spend money today. Then you showed them the lint you pulled out of their vent after you cleaned it. That visual closes the upsell to the annual maintenance plan every time.

CARIBBEANEARNERPRINCIPLE

Grenada rebuilt its economy after Hurricane Ivan devastated 90% of the island in 2004 — not by waiting for perfect conditions but by starting with what was available. One piece of equipment, one service, one client at a time.

Equipment, Process and Proof

Everything you need, how the cleaning works, and how to show the client what you found.

The dryer vent cleaning business requires one primary piece of equipment and a vehicle. The process takes 45–60 minutes. The proof you show the client at the end — the lint and debris you extracted — sells the annual maintenance plan without any additional pitch.

1	The Equipment — Under \$400 Total Dryer vent cleaning brush kit with flexible rods: \$60–\$100. Vacuum (shop vac works, portable leaf blower as air flush tool): \$50–\$80. Flashlight for vent inspection: \$20. Drop cloth to protect floor: \$10. Business cards and invoice book: \$20. Total investment: under \$400.
2	The Cleaning Process — Step by Step Disconnect the dryer from the wall. Locate the exterior vent cap. Insert your brush kit from the interior and push through to the exterior, rotating to dislodge lint buildup. Use the leaf blower to flush remaining debris out the exterior vent. Vacuum the interior connection and the area behind the dryer. Reconnect. Run dryer for 2 minutes to confirm airflow. Done.
3	The Proof — Show What You Found Photograph the lint and debris you removed before disposing of it. Show the client. In most homes that have never been cleaned, the extraction is substantial and visually alarming. That photograph is your most powerful upsell tool and your best social media content. Post every extraction — with client permission — in Caribbean community groups.
4	The Annual Maintenance Contract — Close on Site After every first cleaning: 'I recommend cleaning your vent every 12 months. I offer an annual service for \$125 — you save \$25 on each cleaning and I send you a reminder so you never have to think about it. Want me to put you on the schedule for next year?' Close rate on this offer after a successful first cleaning: over 70%.

Building a Route of Annual Recurring Clients

How 50 clients becomes \$30,000/year in guaranteed recurring income.

The dryer vent cleaning business has a uniquely powerful recurring revenue structure. Once a client has their vent cleaned by you and experiences the service, 70%+ sign up for an annual maintenance plan. At 50 annual maintenance clients, you have \$6,250–\$12,500 in guaranteed income before you book a single new client in any given year.

Annual Clients	Annual Rate	Guaranteed Recurring Revenue	New clients needed to grow
25 clients	\$125/year	\$3,125/year	New clients fill remaining schedule
50 clients	\$125/year	\$6,250/year	Significant base income
100 clients	\$125/year	\$12,500/year	Half-time income guaranteed
200 clients	\$125/year	\$25,000/year	Full-time income guaranteed

MONTHLY ROUTE STRUCTURE

At 100 annual clients your schedule looks like this: 8–9 recurring service appointments per month from your maintenance list. Each takes 45–60 minutes at \$125. That is \$1,000–\$1,125 in guaranteed income before you take a single new booking. New clients fill the remaining days at \$150–\$200 each. Total: \$2,500–\$4,000/month from a service that requires one piece of equipment and no employees.

Finding Your First Clients in the Caribbean Community

Your warmest market and the referral channels that fill your schedule fast.

Caribbean homeowners have the same dryer vent risk as every other homeowner — and they have the same trust in a Caribbean professional who comes recommended from their community. The referral chain in Caribbean networks is exceptionally fast. One satisfied client in a Caribbean Facebook group generates 5–10 inquiries within 24 hours.

1**Caribbean Facebook Groups — Your Launch Channel**

Post: 'I offer professional dryer vent cleaning for Caribbean homeowners in [city]. Did you know clogged dryer vents are the leading cause of home dryer fires? I clean vents in under an hour, show you what I remove, and offer annual maintenance to keep your home safe. \$150 for the first cleaning. DM me to book.' Post this in every Caribbean community group in your city.

2**Before-and-After Content — Your Ongoing Marketing**

After every cleaning, photograph the lint extraction. Post it on Facebook, Instagram, and WhatsApp with the caption: 'This came out of a dryer vent that had never been cleaned. Your dryer is working twice as hard as it needs to — and your home is at fire risk. Book a cleaning with Caribbean Home Safety Services.' That content generates bookings every time.

3**Real Estate Agents and Home Inspectors**

Home inspectors frequently flag dryer vent maintenance as a recommended service. Introduce yourself to Caribbean real estate agents and home inspectors directly — offer a referral fee of \$20 per booking they send you. One home inspector who sees 10 homes per week generates 3–5 referrals per month.

4**New Caribbean Homeowners**

First-time Caribbean homeowners who just moved in have no idea when their dryer vent was last cleaned. Partner with Caribbean real estate agents to send a dryer vent cleaning offer to every new homeowner closing in Caribbean neighborhoods. These clients become annual maintenance clients at the highest rate of any channel.

CARIBBEAN EARNER PRINCIPLE

St. Kitts built its entire financial sector on one founding principle — protect the structure before you grow it. Your pricing structure and service standards are your foundation. Get them right from client one.

Add-On Services and Upsells

AC vent cleaning, air duct inspection, and maintenance checks that double your job value.

- 1

AC Vent Cleaning — Your Highest-Value Upsell

After completing a dryer vent cleaning, walk the client to their AC vents: 'While I am here, would you like me to check your AC vents? Dusty vents reduce air quality and make your system work harder — I can clean them for \$75.' Caribbean homeowners in warm climates run their AC constantly. Dirty vents are universal. This upsell adds \$75 to every job with 15 minutes of additional work.
- 2

Air Quality Inspection — Positioning for Premium Pricing

An air quality and vent inspection service at \$200–\$300 covers the dryer vent, AC vents, bathroom exhaust fans, and kitchen range hood. Positioned as a complete home air quality check, this premium service targets Caribbean homeowners who are health-conscious and willing to invest in their home environment.
- 3

Dryer Maintenance Check — Mechanical Add-On

Check that the dryer drum seals are intact, the exhaust hose is undamaged, and the exterior vent cap opens and closes freely. Note any issues and refer to an appliance repair technician if needed. This 10-minute check adds professional credibility and can justify a \$25–\$50 premium over basic vent cleaning alone.

Service	Price	Time Added
Dryer vent cleaning (base)	\$150–\$200	45–60 min
AC vent cleaning (upsell)	\$75	15 min
Dryer maintenance check (add-on)	\$25–\$50	10 min
Complete home air quality check	\$200–\$300	90 min total
Annual maintenance plan	\$125/year	Same as standard

Scaling to a Multi-Service Business

From solo operator to team with commercial and multi-unit accounts.

The dryer vent cleaning business scales through additional technicians and commercial accounts. Apartment complexes, laundromats, and commercial laundry facilities need dryer vent cleaning at scale — and they pay per unit on a contracted annual schedule. One apartment complex with 100 units at \$75/unit/year = \$7,500/year from one relationship.

Stage	Monthly Cleanings	Revenue	Recurring Base
Solo starting	20	\$3,000–\$4,000	\$0
Solo established	40	\$5,000–\$8,000	\$500–\$1,000/mo
Solo + 50 annual clients	50 + recurring	\$7,500–\$10,000	\$1,500–\$2,500/mo
2 technicians + commercial	100+	\$15,000–\$20,000	\$3,000–\$5,000/mo

One Service. Every Home Needs It.

The safety pitch writes itself. The recurring income is built into the service structure. The Caribbean community referral chain is your fastest client acquisition channel. The only step between you and your first \$150 is the door you have not knocked yet.

YOUR FIRST 30-DAY ACTION PLAN

Week 1 — Get your equipment

Order your dryer vent cleaning brush kit (\$60–\$100) and shop vac if needed. Practice the process on your own dryer. Time yourself. Know the process before your first paid job.

Week 2 — Launch to the community

Post your before-and-after content offer in Caribbean Facebook groups. Offer the first 10 cleanings at \$120 in exchange for a photo and a review. Target 5 bookings in week two.

Weeks 3–4 — Close annual maintenance contracts

After every first cleaning, pitch the annual maintenance plan. Target 70% conversion. By end of month four, you should have 20+ annual clients generating guaranteed recurring income.
