Smart Home Setup Blueprint

Set Up Smart Devices. Build a Tech Service Business. Get Paid Monthly.

1 The Smart Home Services People Actually Pay For

2 Learning the Devices — Faster Than You Think

3 Building a Monthly Smart Home Support Business

\$100/hr

Average effective rate across a standard smart home setup visit

Multiple devices per visit · Monthly support retainer possible · Caribbean community tech trust is your edge

TRIED AND TESTED

Smart home technology is growing faster than homeowners can keep up with it. Ring doorbells, Nest thermostats, Philips Hue lighting, Google Home systems, Alexa integrations — every Caribbean household that invests in these devices faces the same problem: setup is confusing, time-consuming, and frustrating enough that most devices sit in boxes for weeks after purchase. You are the person who takes them out of the box, sets everything up, and shows the homeowner how it all works.

CHAPTER ONE

The Smart Home Services People Actually Pay For

1 The most requested setups

Ring/Nest doorbell installation and app setup: \$75–\$150 · Smart thermostat (Nest, Ecobee) installation: \$100–\$150 · Smart lighting system (Philips Hue, LIFX) setup: \$75–\$100 for up to 5 lights · Whole-home Alexa or Google Home integration: \$100–\$200 · Security camera system setup: \$150–\$350 depending on number of cameras

2 The monthly support angle

Once you set up a client's smart home, offer a \$50–\$75/month support retainer — you handle any app issues, device resets, new device additions, and wifi troubleshooting. Most smart home owners encounter 1–2 issues per month they cannot resolve. You resolve them remotely in 10 minutes. Twenty clients on a \$60/month retainer is \$1,200 passive monthly income from phone support.

CHAPTER TWO

Learning the Devices — Faster Than You Think

1 How to get up to speed

Every major smart home device has official setup videos on YouTube. Spend one weekend watching Ring, Nest, Philips Hue, and Alexa setup tutorials. Then buy one of each on Amazon (return them after if needed) and practice the setup yourself. Once you have done it twice you can do it in your sleep.

2 The Wi-Fi password is everything

90% of smart home setup is getting the device connected to the client's Wi-Fi. Always ask for the Wi-Fi password before arriving. Always confirm the router is working properly. Most setup failures are network issues, not device issues.

CHAPTER THREE

Building a Monthly Smart Home Support Business

1

The retainer pitch

After every setup job: 'Smart home devices need occasional resets, updates, and troubleshooting. I offer a monthly support plan for \$60 — any issues, you call or text me and I handle it remotely or come out within 48 hours. Want me to set that up?' Most clients say yes on the spot.

2

Growing to commercial

Hotels, Airbnb hosts, and short-term rental operators need smart home management at scale. A Caribbean Airbnb host in your city managing 3–5 properties is a single client worth \$180–\$375/month in support retainers alone.

BUILD YOUR BUSINESS WEBSITE – PERSONAL NOTE

While all the steps in this guide work to get your first clients through community outreach, A service page for your smart home business — listing every device you support, your pricing, and a booking form — builds credibility with clients who want to verify you are legitimate before inviting you into their home. I found it significantly easier to use Lovable — an AI site builder where you describe what you want and it builds a clean professional site in minutes. No coding. Check it out.
